Notes:

- 1 – Not Applicable. No data was submitted to the Agency. A 6-page recommendation document and 315 pages of previously published documents were submitted.
- 2 – The Sierra Club QAPP submitted with the datasets in 2018 does not include laboratory names; therefore, the accreditation status of the laboratory could not be verified.
- 3 – The Sierra Club QAPP submitted with the datasets in 2018 includes several laboratory and field methods which are not approved in the 40 CFR Part 136. There are numerous occurrences where a question mark is in place of a method number.
- 4 – Laboratory accreditation and use of approved methods could not be verified; a QAPP was not submitted with the datasets.
